Product Details

Load Mode:	Back Lifting	**Navigationtechnology:**	LiDAR And SLAM
Maximumspeed:	1.5 M/s	**Usage:**	Warehouse Automation Handling
Batterylife:	8 Hours	**Drive Mode:**	Differential Drive
Pick Up Weight:	300KG	**Size:**	Customization
Highlight:	**AMR Autonomous Mobile Robot**		

Payment & Shipping Terms

Minimum Order Quantity	1	**Packaging Details**	wooden box
Delivery Time	30-40 work days	**Payment Terms**	T/T
Supply Ability	100

Dual-laser Factory Handling Robot AGV Chassis 300KG Automatic Navigation Industrial Transportation and Distribution

Product Description

The Dual-LiDAR AGV Chassis for Factory Handling Robots features a 300kg load capacity and supports autonomous navigatio industrial transport and distribution. Built with a durable sheet metal frame, it delivers exceptional stability, high load-bearing cap and wide application versatility. Equipped with a jacking mechanism, it enables autonomous lifting and independent cargo hand The system integrates 3D cameras and LiDAR technology for active obstacle avoidance.

Key Features

- Load Mode: Back Lifting
- Type: Trackless Transfer Cart

Technical Specifications

Drive Mode	Mecanum wheel
Type	Autonomous Mobile Robot
Application	Transporting And Handling Material Boxes
Obstacle Avoidance	Real-time obstacle detection and avoidance
Maximum Load Capacity	300kg
Material	Steel
Maximum Speed	1.5 m/s
Load Mode	Back lifting

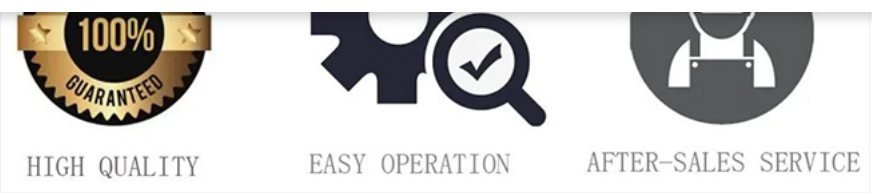

Applications

The TIANYUE AGV Robot (Automated Guided Vehicle System) is certified with 3C and CE standards, designed for diverse indu applications including manufacturing plants, warehouses, and assembly lines. Its trackless transfer capability eliminates the nee fixed infrastructure while advanced safety features ensure reliable operation.
